

Incentives available to cut your energy costs

If your Society is looking to make energy efficient upgrades for multi-unit residential buildings and suites, we can help make it happen.

We provide financial incentives for Societies associated with BC Housing and the BC Non-Profit Housing Association for upgrades such as:

- Lighting, HVAC and refrigeration retrofits
- Energy study funding
- Project implementation funding
- Heat pumps, electric water heaters, commercial kitchen and refrigeration equipment, LED lighting and controls, and variable speed drive upgrades
- Home energy assessments and energy saving product installations

We have partnered with BC Non-Profit Housing Association (BCNPHA) who will coach you on your retrofit projects.

Their team also has the latest information on utility incentives and available government funding.

How it works

Reach out to the BC Non-Profit Housing Association (BCNPHA).

Plan your upgrade with a member of the BC Non-Profit Housing Association Asset Management Team to find out which incentive is recommended for you.

Let's get started

Get in touch with the BC Non-Profit Housing Association (BCNPHA) to get started on your upgrade by emailing energy@bcnpha.ca.
