

Social Housing Retrofit Support Program for Multi-Unit Residential Buildings

Energy efficiency retrofits can be challenging, but **FortisBC's** and **BC Hydro's** joint **Social Housing Retrofit Support Program** can help you with these challenges. The program is open to non-profit, co-operative and Indigenous housing providers operating multi-unit residential buildings.

The program provides rebates for the following supports:

Energy study – up to \$5,000

- Hire a FortisBC/BC Hydro approved engineering consultant to perform an energy study to identify and develop business cases for potential energy efficiency retrofits.

Implementation support – up to \$7,000

- Hire consultant to help implement the energy efficiency retrofits. The consultant can optimize the retrofit through proper design and construction management.

Rebates for energy conservation measures

- FortisBC and BC Hydro provides rebates for the following energy conservation retrofits:

Equipment type	Fuel
Boilers	Natural gas
Commercial kitchen equipment	Natural gas and electricity
Commercial refrigeration equipment	Electricity
Commercial water heaters	Natural gas and electricity
Heat pumps	Electricity
LED lighting and controls	Electricity
Mechanical systems and controls	Natural gas and electricity
Variable speed drives	Electricity
Windows and insulation	Natural gas
