

## Boiler and Tank Program

BCNPHA has partnered with the Viessmann, one of the world's leading manufacturers of heating and renewable energy systems, to assist non-profit housing societies make more efficient choices when purchasing boilers and hot water tanks for their buildings. The Boiler & Tank Program assists non-profit housing providers lower their costs, create efficiency and cost-effectiveness in key areas, and increase their revenue.

As an environmental pioneer, Viessmann has been supplying highly efficient and renewable heating systems for several decades. With a complete line of high-efficiency oil and gas-fired boilers and control technology, Viessmann offers innovative heating solutions to deliver maximum energy savings and performance.

### Program benefits

#### Participating non-profit societies benefit from:

- Rebates on purchases of Viessmann boilers and tanks.
- Tools to right-size equipment and reduce energy costs.
- Potentially better return on investment from boiler and tank purchases.
